Computer Methods in Applied Mechanics and Engineering 111 (1994) 391–392
North-Holland

Cumulative contents of Volume 111

Volume 111, Nos. 1–2, January 1994

Physical and computational aspects of chemically reacting hypersonic flows
J. Argyris, I.St. Doltsinis, H. Friz and J. Urban 1

Buckling of multilayered composite plates by natural shear deformation matrix theory
J. Argyris and L. Tenek 37

Numerical analysis of large deformation rigid-plastic problems in dynamic range by quadratic extremum principles
A. Carini and O. De Donato 61

Numerical results and stability analysis for the computation of the transonic flow problems using an artificial time formulation
P. Klouček 85

Unconditional stability and long-term behavior of transient algorithms for the incompressible Navier–Stokes and Euler equations
J.C. Simo and F. Armero 111

A deterministic method to predict the effect of unknown-but-bounded elastic moduli on the buckling of composite structures
I. Elishakoff, Y.W. Li and J.H. Starnes, Jr. 155

Improving condensation methods for eigenvalue problems via Rayleigh functionals
K. Rothe and H. Voss 169

An a posteriori error estimate for finite element approximations of the Navier–Stokes equations
J.T. Oden, W. Wu and M. Ainsworth 185

Volume 111, Nos. 3–4, January 1994

Studies on ceramic coatings. Deduction of mechanical and thermal properties from the microstructure of the material
J. Argyris, I.St. Doltsinis, M. Eggers and R. Handel 203

Recent developments in the algebraic multiblock method for Euler equations
A.E. Kanarachos, N.G. Pantelelis and C.G. Provatidis 235

Edges, stars, superedges and chains
R. Löhner 255

Finite element methods for parabolized Navier–Stokes equations
Y. Bourgault, P. Caussignac and L. Renggli 265

A fictitious domain method for Dirichlet problem and applications
R. Glowinski, T.-W. Pan and J. Periaux 283

Stability assessment of a unified variational boundary integral method applicable to thin scatterers and scatterers with corners
X. Zeng and J. Bielak 305

A new approach to minimising the frontwidth in finite element calculations
C.C. de Souza, R. Keunings, L.A. Wolsey and O. Zone 323

Efficient analytical integration of symmetric Galerkin boundary integrals over curved elements: Thermal conduction formulation
C. Balakrishna, L.J. Gray and J.H. Kane 335

Optimal low order finite element methods for incompressible flow
D. Silvester 357

A variational method for finite element stress recovery and error estimation
A. Tessler, H.R. Riggs and S.C. Macy 369
